

KEY FINDINGS: NEW ZEALAND

Did you know?

- Total daily care time of household and non-household members in New Zealand is the second highest in the OECD at 48 minutes, just above Australia (45 minutes) and well below Ireland at the top (62 minutes). The OECD average is 26 minutes. [[Fig1.8.xls](#)]

- Unpaid work in New Zealand accounts for 43% of GDP, the third highest in the OECD after Australia (46%) and Portugal (53%). [[Fig1.13.xls](#)]
- Along with Israel, Iceland and Turkey, New Zealand is one of only four OECD countries (Israel, Iceland and Turkey being the others) with a fertility rate at 2.14 children per woman sufficient to replace the population in the coming generation (over 2.1 children per woman) [[GE2.xls](#)]
- With more than one in five foreign-born, New Zealand has the sixth highest proportion of their population born offshore in the OECD. [[GE3.xls](#)]
- New Zealand 15-year-olds have the fourth highest Programme for International Student Assessment (PISA) reading score in the OECD, after Korea, Finland and Canada. [[SS3.xls](#)]
- After Canadians and Australians, at 81% New Zealanders report the highest perceived community tolerance of minority groups – ethnic minorities, migrants, and gays and lesbians – in the OECD, well above the OECD average of 61%. [[CO5.xls](#)]
