

Consumption Tax Trends* - Sweden

VAT rate 2019

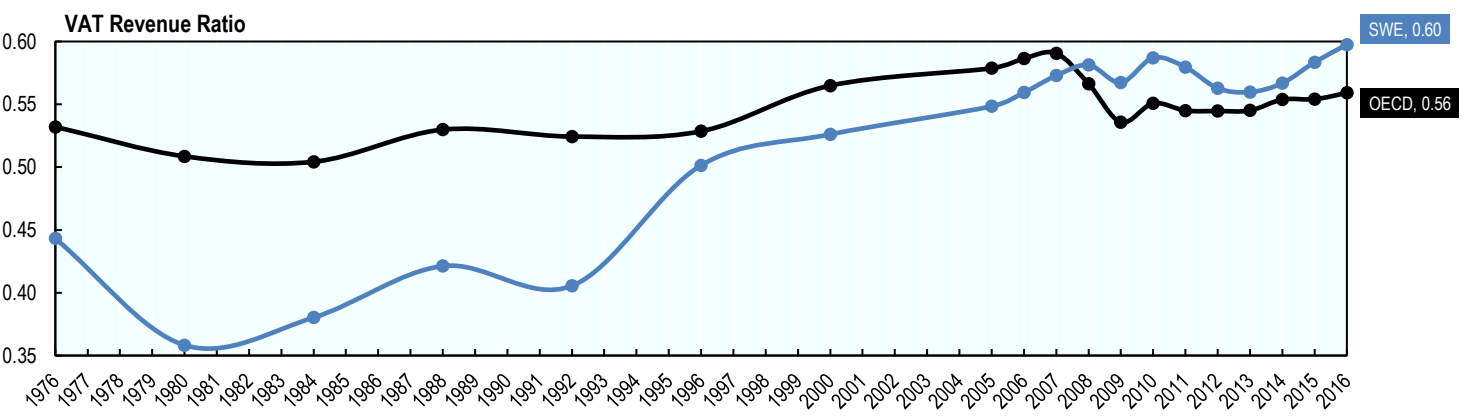

The Swedish standard VAT rate is 25.0%, which is above the OECD average. The average VAT/GST¹ standard rate in the OECD was 19.3% as of 1 January 2019. The previous standard VAT rate in Sweden was 23.46% in 1989. It changed to the current level in 1990. Sweden applies reduced VAT rates of 0%, 6% and 12% to a number of goods and services. VAT was introduced in Sweden in 1969 at a standard rate of 11.11%. Since then the minimum and maximum standard rates have been at 11.11% and 25.0% respectively.

1. VAT/GST refers to value added tax/goods and services tax

VAT Revenue Ratio

The VAT Revenue Ratio (VRR) for Sweden was 0.60 in 2016, above the OECD average of 0.56. The VRR is a measure of the revenue raising performance of a VAT system. A ratio of 1 would reflect a VAT system that applies a single VAT rate to a comprehensive base of all expenditure on goods and services consumed in an economy - with perfect enforcement of the tax. Relative to the pre-crisis level of 2007 (0.57), the Swedish VRR position has increased by 0.03 percentage points. The Swedish VRR increased from 0.57 in 2014 to 0.60 in 2016. The lowest VRR was recorded in the year 1980 at 0.36 and the highest level in 2016 at 0.60.

The figures may not present the difference to the second decimal point accurately due to rounding

Consumption Tax Trends 2018

VAT/GST and Excise Rates, Trends and Policy Issues

oe.cd/consumption-tax-2018

Consumption Tax Trends provides information on Value Added Tax/Goods and Services Tax (VAT/GST) and excise duty rates in OECD member countries.

It also contains information about international aspects of VAT/GST developments and the efficiency of this tax. It describes a range of other consumption taxation provisions on tobacco, alcoholic beverages and motor vehicles.

International VAT/GST Guidelines

oe.cd/international-vat-gst-guidelines

The International VAT/GST Guidelines now present a set of internationally agreed standards and recommended approaches to address the issues that arise from the uncoordinated application of national VAT systems in the context of international trade.

They focus in particular on trade in services and intangibles, which poses increasingly important challenges for the design and operation of VAT systems worldwide.

They notably include the recommended principles and mechanisms to address the challenges for the collection of VAT on cross-border sales of digital products that had been identified in the context of the OECD/G20 Project on Base and Erosion and Profit Shifting (the BEPS Project).
