OECD Publishing is responsible for disseminating the content of the OECD (Organisation for Economic Co-operation and Development) whose mission is to promote policies that will improve the economic and social well-being of people around the world.

The OECD brings governments together to share experiences and seek solutions to common problems. We don’t just work with governments, but also with business, labour, academia and other civil society organisations to understand what drives economic, social and environmental change. We analyse and compare data to predict future trends. We set international standards on all sorts of things, from the safety of chemicals to the quality of cucumbers.

We look, too, at issues that directly affect the lives of ordinary people, like how much they pay in taxes and social security. We compare how different countries’ school systems are readying their young people for modern life, and how different countries’ pension systems will look after their citizens in old age.

This information is published in books, journals and data services. All of them are available via our global knowledge base, OECD iLibrary.

OECD is one of the most innovative publishers in its field and one of the most prolific and reliable sources of comparable economic and social data.

**OECD Core Values**

- **Objective:**
  Our analyses and recommendations are independent and evidence-based.

- **Open:**
  We encourage debate and a shared understanding of critical global issues.

- **Bold:**
  We dare to challenge conventional wisdom starting with our own.

- **Pioneering:**
  We identify and address emerging and long term challenges.

- **Ethical:**
  Our credibility is built on trust, integrity and transparency.

Introduction

OECD iLibrary is the global knowledge base for OECD’s data and analysis.

It contains all books and papers published since 1998 – as well as a vast collection of statistics, with data going back to the early 1960s and more than 80 countries are covered.

Users can search and click directly to chapters, articles, books, tables, databases, etc. These content items are available in different formats and languages.

As one of the most comprehensive online resources on the world economy, society, education and environment, OECD iLibrary is a powerful tool for people working at academic institutions, in the private sector and at governmental or non-governmental organisations.

Breadth Of Content

OECD iLibrary provides online access to all publications and statistics, released since 1998, from OECD, IEA (International Energy Agency), NEA (Nuclear Energy Agency), OECD Development Centre and ITF (International Transport Forum).
Key Figures

- **17** Thematic Collections
- **6 200** e-Book Titles
- **14 000** Chapters
- **1 000** Journal Issues
- **12 000** Articles
- **2 700** Working Papers
- **2 500** Multilingual Summaries
- **14 000** Tables and Graphs
- **34 000** StatLinks to MS Excel™ tables in full-text items
- **290** Cross-searchable Datasets
- **4 billion** Data Points
Improved User Experience

OECD iLibrary fully integrates OECD data and analysis thus facilitating the discovery process.

Supported by significantly enriched metadata, and the systematic use of DOIs (Digital Object Identifiers), users can find and cite individual tables, graphs and datasets as easily as articles and chapters.

From the home page, there is the option to browse by theme and/or country. An Advanced Search function is also available.

Search results allow quick access to all content types (books, chapters, journals, articles, tables, datasets, etc) in any available content format: PDF, WEB, XLS, DATA, ePUB.
Suits all users

OECD is constantly releasing new data, analyses and forecasts. Access to this information enables major trends to be identified at a very early stage.

From ready-made tables to interactive databases, from “at a glance” publications to full reports, OECD iLibrary offers a wide range of material suitable for all types of users:

**Universities and research organisations**

- keep abreast of the latest international developments in your field
- identify and explain new phenomena in the world economy, society and environment
- underpin your research with the latest and most reliable data

** Businesses**

- gain an in-depth view of individual markets and countries
- uncover hidden growth potential
- identify potential risks
- monitor the policies which could affect a particular industry or region
Ease Of Access

Getting access to OECD iLibrary is simple. First of all, your institution needs a subscription. There are several types to choose from, each providing twelve months’ access to a part, or all, of OECD iLibrary:

- **Full package (OECD Books, Papers and Statistics)**
- **17 thematic collections**
- **Individuals journals or statistical periodicals**
- **Individual OECD or IEA databases**

Prices are available from your sales contact on the back of this brochure or at: www.oecd-ilibrary.org/about/about

---

**Government and public administration**

- learn which policies work well in other countries and why
- determine which new policy measures could be successfully implemented in your country
- profit from OECD’s independent expertise

**Non-governmental organisations and think tanks**

- compare your country’s performance with others’
- see where legislation could be improved
- deliver convincing arguments for the need for reform in a particular field
- use OECD recommendations as a basis for alternative approaches
Once your institution has subscribed you can:

- make the content available to users at no further cost
- give users the best possible service with 24/7 unlimited concurrent access to the entire OECD collection of publications and statistics
- benefit from access via IP address recognition and/or username/password login
- benefit from perpetual access to all subscribed content and archive since 1998
- benefit for many features as MARC records and COUNTER3-compliant usage statistics

Thousands of institutions worldwide make OECD content available to their users through OECDiLibrary.

More than 1,200 of these provide access to all books, papers and statistical databases, with a global reach of more than 15 million users.

OECD iLibrary continues to evolve, with new features and enhancements being added all the time. As part of the process of continuous improvement, we always welcome your comments and feedback at:

oecdilibrary@oecd.org
THEMES
OECD is well known for its methodology for measuring support to agriculture in an internationally comparable way. It also conducts policy reviews and analysis on agriculture and fisheries policies issues and carries out an annual medium-term forecasting exercise. The Producer Support Estimate (PSE – a measure of support to agriculture) is a key tool developed by OECD to compare agricultural policy performance across countries and to track progress in policy reform.

Did you know…

… that the UN Millennium Development Goals - measurable targets for development - were inspired by the 1996 OECD Strategy paper Shaping the 21st century?

OECD work on the subject aims to increase the effectiveness of common efforts to support sustainable development. It helps policy makers in OECD and developing countries to find innovative solutions to the global challenge of development, poverty alleviation and the curbing of inequality. It brings together the knowledge and experience in different countries and puts the results at the disposal of the international community, policy makers, academics, the corporate sector and civil society.

www.oecd-ilibrary.org/economics

ECONOMICS

- Over 1100 ebooks
- Over 5110 chapter files
- Over 900 issues and articles
- Over 280 datasets

Economics is the discipline on which OECD work is built and economic statistics are the basis for much of OECD’s analysis. This work relates to both macroeconomic and structural issues, and in particular their effect on policies. OECD work on this field is based on continued monitoring of events in member countries as well as outside the OECD area and includes regular projections of short and medium-term economic developments.

OECD’s work on education includes the gathering of statistical data, the conduct of policy reviews and analysis, and the use of survey data to improve learning outcomes (PISA). OECD statistics and survey data provide a strong evidence base helping OECD member countries improve the quality, equity, efficiency and effectiveness of their education systems. OECD work also covers research into early childhood education and care, teaching quality and recruitment, e-learning and lifelong learning.

Did you know…

… that over half of the global labour force works in the informal sector and this figure is expected to rise in 2030?

EMPLOYMENT

www.oecd-ilibrary.org/employment

- Over 320 ebooks
- Over 580 chapter files
- Over 30 issues and articles
- Over 85 datasets

OECD work in this field covers analysis of employment, unemployment and labour market policies, closely linked to social policy and education. It monitors countries’ employment reforms in key areas such as active labour market policies, employment protection, minimum wage, vocational training and adult learning. It also provides country-specific analyses and tailored policy recommendations to help governments create more and better jobs for vulnerable groups, such as younger, older and disabled workers.

Did you know...

... that by 2030, the world will need 60% more energy and that two-thirds of the extra demand will come from developing countries?

ENERGY – IEA
www.oecd-ilibrary.org/energy

- Over 360 ebooks
- Over 1,300 chapter files
- Over 220 issues and articles
- Over 55 datasets

The International Energy Agency (IEA), which falls under the OECD administrative umbrella, was created in response to the first energy crisis back in the 1970s. IEA works to ensure reliable, affordable and clean energy for its 28 member countries and beyond. IEA addresses all types of energy sources. It gathers statistics on world energy markets, analyses those markets and the technologies that support them, and evaluates policies to make them operate better.

Did you know…

… that almost four billion people will live in water-stressed areas by 2030 if better policies are not introduced?

A healthy environment is a pre-requisite for a strong and balanced economy, and both are needed for sustainable development. The OECD provides a forum for countries to share their experiences and to develop concrete recommendations for policies that can address environmental problems in an effective and economically efficient way, including through performance reviews, data collection, policy analysis, and projections.

FINANCE AND INVESTMENTS

www.oecd-ilibrary.org/finance

- Over 430 ebooks
- Over 1300 chapter files
- Over 200 issues and articles
- Over 75 datasets

The OECD works with governments to improve domestic and global policies that affect business and markets. It identifies best practices and policies designed to keep markets open, competitive and sustainable while combating market abuses and economic crime through international co-operation. The OECD takes up public policy challenges of direct concern to business – including investment, finance, anti-corruption, corporate governance, competition, private pensions, insurance and private sector development – to enhance economic growth and development and to ensure financial stability.

OECD work on governance aims to identify changing societal and market needs and assist countries in adapting their public sector governance arrangements to the changing needs of society. This involves improving government efficiency while protecting and promoting society’s longer-term governance values. OECD work on governance also covers the analysis of national e-government programmes, regulatory policies and the creation of policy instruments for the public sector to fight corruption and build integrity.

Did you know…

… that government expenditure is equivalent to almost 50% of GDP in OECD countries?

… that over the last decade R&D spending in the service sector grew four times faster than in manufacturing?

INDUSTRY AND SERVICES

www.oecd-ilibrary.org/industry

OECD work on Industry and Services helps governments to formulate micro-level policies to foster the development of industries and enterprises. Analyses address issues relating to large and small firms in manufacturing and service sectors at local, national and international levels. Entrepreneurship, innovation, corporate governance, tourism, industrial restructuring and globalisation are among the topics studied and discussed by OECD and non-OECD countries.

Did you know…

… that current uranium supplies are sufficient to fuel nuclear power plants for roughly a century, and potentially up to thousands of years with certain new reactors?

NUCLEAR ENERGY – NEA

www.oecd-ilibrary.org/nuclear

- Over 300 ebooks
- Over 730 chapter files
- Over 10 working papers
- Over 150 issues and articles

The Nuclear Energy Agency (NEA) represents much of the world’s best nuclear expertise, bringing together 29 OECD member countries. The NEA’s mission is to assist its member countries in maintaining and developing, through international co-operation, the scientific, technological and legal bases required for the safe, environmentally friendly and economical use of nuclear energy for peaceful purposes. It provides authoritative assessments and forges common understandings on key issues as input to government decisions on nuclear energy policy, and to broader OECD policy analyses in areas such as energy and sustainable development.

SOCIAL ISSUES, MIGRATION AND HEALTH

www.oecd-ilibrary.org/socialissues

- Over 500 ebooks
- Over 1650 chapter files
- Over 250 working papers
- Over 35 datasets

Combating poverty and social exclusion remain high on the policy agenda in all countries within and outside the OECD. Providing benefits to people in need can help alleviate the worst social and economic hardship, but such policies cannot replace a comprehensive strategy of social development. Social policy work in the OECD covers a wide array of social, education and health policies implemented in a continuously changing environment of socio-demographic factors, labour markets, and technical progress.

Did you know…

… that OECD Model Tax Convention is the basis for over 3 000 bilateral tax treaties in force around the world and the main means for avoiding double taxation?

TAXATION

www.oecd-ilibrary.org/taxation

- Over 200 ebooks
- Over 550 chapter files
- Over 100 issues and articles
- Over 75 datasets

OECD’s taxation work covers a broad range of activities, including tax evasion, harmful tax practices and environmental taxes. The OECD produces internationally comparable statistics, sets tax standards, such as the OECD Model Tax Convention and engages in monitoring and assessing policies. The in-depth analysis provides national authorities with options for reforming the tax system so as to improve efficiency, equity and enforceability.

Did you know...

... that trade declined sharply in 2009 and that the OECD is working on how policy responses could help restore financial stability and sustainable long-term growth?

TRADE
www.oecd-ilibrary.org/trade

- Over 250 ebooks
- Over 600 chapter files
- Over 800 issues and articles
- Over 40 datasets

Reflecting the globalisation of industrial activities and the intertwined nature of trade dimensions with other policy fields, OECD work on trade has shifted from an emphasis on trade in goods to a more interdisciplinary consideration of trade issues. It helps forestall trade tensions and conflicts that emerge under the pressure of ever-intensifying competition. Trade work also encompasses the issue of export credits, trade facilitation, non-tariff measures and aid for trade.

Did you know...

...that transport accounts for 23% of global CO₂ emissions from fuel combustion?

TRANSPORT – ITF

www.oecd-ilibrary.org/transport

- Over **350** ebooks
- Over **350** chapter files
- Over **100** working papers

The International Transport Forum (ITF), also under the OECD’s administrative umbrella, is a think tank for global transport policy, providing evidence-based insights for policy-makers and the global transport community. Its work is underpinned by economic research, statistics collection and policy analysis, often undertaken in collaboration with leading research figures in academia, business and government. The International Transport Forum maintains a range of statistics and indicators on transport, trade, infrastructure investment, road safety and global transport greenhouse gas emissions.

Did you know…

… that OECD is actively working with national governments, cities and regions to highlight the role of metropolitan areas in delivering cost-effective policy responses to climate change?

URBAN, RURAL AND REGIONAL DEVELOPMENT

www.oecd-ilibrary.org/regions

- Over 250 ebooks
- Over 820 chapter files
- Over 20 datasets

OECD work on this subject area examines how regions, whether urban, rural, crossborder or metropolitan, contribute to national growth. This work focuses on how a place-based development model, a multi-sector policy approach that harnesses endogenous strengths and assets using networked, multi-level governance mechanisms, is best suited to achieve regional and aggregate growth outcomes. The integrated analysis of historical, cultural and socio-economic factors can explain why and how a given territory can improve its own prospects for growth and development.

Databases

- OECD Regions Statistics
OECD has long been an innovator in the production and dissemination of Statistics, making them easy to find, use and cite. The OECD iLibrary Statistics Home Page provides entry to three types of statistical content according to the profile of the user and the format of information required.

**OECD Databases** - for experienced users wanting to access the latest available OECD data, to build their own tables and graphs, export the figures into their own analytical software.

**OECD Key Tables** - the most popular and frequently requested indicators have been formatted for users to copy and paste straight into their reports.

**OECD Statistical Books** - provides the archive version, essential for users wishing to check older numbers, with a back catalogue to 1998. Each table is available in three different formats: WEB, PDF and XLS.
Did You Know?

… that since 2000 the OECD Programme for International Student Assessment (PISA) allows anybody interested in education to compare 15 years old students’ performance across countries?

Key Figures

- Over 290 cross-searchable databases
- Over 4 billion data points
- Over 100 key tables
- Over 50 statistical periodicals and serials

OECD iLibrary provides a common knowledge base where users can discover and access statistical databases from the OECD and IEA. Users can build tables and extract data from across databases as well as work within individual databases. Extractions of million datapoints can be made in a range of formats. Each database includes detailed metadata to help you understand the numbers.

The following databases are currently available on OECD iLibrary:

- International Trade by Commodity Statistics
- Main Economic Indicators
- Monthly Statistics of International Trade
- Agriculture Statistics
- Banking Statistics
- Economic Outlook
- Education Statistics
- Employment & Labour Market Statistics
- Health Statistics
- Institutional Investors Statistics
- Insurance Statistics
- International Development Statistics
- International Direct Investment Statistics
- International Migration Statistics
- National Accounts Statistics
- Patent Statistics
- Pensions Statistics
- Productivity Statistics
- Regional Statistics
- Science, Technology & R&D Statistics
- Social Expenditure Statistics
- Statistics on International Trade in Services
- Statistics on Measuring Globalisation
- Tax Statistics
- Telecommunications & Internet Statistics
- STAN: Structural Analysis Statistics
- Structural & Demographic Business Statistics
- IEA Statistics

53
The most popular data published by OECD has been gathered into a collection of **Key Tables**.

Accessible in formats to suit the needs of the busy user, more than 100 socio-economic and environmental indicators are available.

These tables are easy to use and freely available for everyone. They are currently available in three different formats: WEB, PDF and XLS.

**KEY TABLES include country statistical profiles and cover the following themes:**

- Agriculture and Food
- Development
- Economics
- Education
- Employment and Labour Markets
- Environment
- Finance and Investment
- Health
- Industry and Services
- Insurance and Pensions
- Nuclear Energy
- Science and Technology
- Social Issues
- Taxation
- Trade
### Economics: Key Tables from OECD

The key tables on economics comprise national accounts data and economic statistics and indicators. These include gross domestic product (GDP), government and private spending, inflation rates, interest rates, unemployment rates and leading indicators. Historical data (with forecasts for some tables) usually refer to the latest eight time periods.

OECD has been publishing **statistical periodicals and serials** since the Organisation began in 1961. With the arrival of electronic publishing OECD was one of the first to make all its content accessible online. The PDFs dating back to 1998 represent an important archive for users wishing to check older figures.

Now the presentation on OECD iLibrary offers the data in WEB, PDF and XLS formats to facilitate discoverability and usability of the data. It has never been easier to find, use and cite the OECD indicators.

**STATISTICAL PERIODICALS:**

- Energy Prices and Taxes
- International Trade by Commodity Statistics
- Main Economic Indicators
- Main Science and Technology Indicators
- Monthly Statistics of International Trade
- Oil, Gas, Coal and Electricity - Quarterly Statistics
- Quarterly National Accounts

**SERIALS including:**

- Central Government Debt
- Health at a Glance
- Labour Force Statistics
- National Accounts at a Glance
- OECD Factbook
- OECD Pensions at a Glance
- OECD Science and Technology and Industry Scoreboard
- World Energy Outlook
FEATURES
Integrated Search

OECD iLibrary has a powerful search engine helping users find the right content easily.

- **The Quick Search** box located at the top of every page gives fast results based on title and abstract metadata for the 50,000 items contained in the platform.

- **Advanced search** enables full text searching and the use of Boolean operators, as well as other parameters: date, content type or language (English, French, German, Spanish, Portuguese, Italian, etc).

In both types of search the results are displayed according to relevance and showing:

- **Content Type**: Article, Chapter, Table, Graph, Book, Database.

- **Formats**: PDF, XLS, WEB, DATA, ePUB.

Search results can be sorted by date or content type. A history of the most recent searches during the active session is maintained allowing users to jump between and combine results.
On OECD iLibrary every single item, from a complete book down to a table in one of its chapters, has its own home page, DOI and bibliographical metadata. The contextual navigation allows users to easily find:

- Publications belonging to a book collection
- Chapters and tables within a title
- In which publication a table, chapter or article was published
- Previous or latest edition of annuals
- Other language versions
- Multilingual summaries in up to 20 different languages
- Subject-related titles
OECD-FAO Agricultural Outlook

OECD's annual statistics and projections for major agricultural commodities. It analyses how global and domestic forces are shaping agricultural markets over the next decade and highlights some of the risks and uncertainties that may influence the agricultural outlook. After presenting a broad overview of the situation and setting out the assumptions used, the report presents detailed projections for production, consumption, trade, stocks, and prices for OECD countries as well as selected non-member countries. Commodities covered include cereals, oilseeds, sugar, meat, and dairy. Since 2005, it has been published as the OECD/FAO Agricultural Outlook.

Expand / Collapse
The use of **Digital Object Identifiers (DOIs)**, for all published items in OECD iLibrary, allows the use of persistent and independent links to the described content anywhere on the internet. Information about a digital object may change over time, including where to find it, but its DOI name will not change and thus always points to its original online presence.

The DOI name has two components, the prefix and the suffix, which together form the DOI name. A DOI name may be assigned to any item of intellectual property, which must be precisely defined by means of structured metadata. The DOI name itself remains persistent through ownership change and remains unaltered once assigned.

All **citation tools** in OECD iLibrary feature the DOI name as the reference link. A new «Cite as» feature allows consistent referencing of any full-text item on the site.

As an innovative tool, this feature also includes the citation of dynamic databases with a link to the original dataset and the exact time at which it has been accessed. The citation tool is compatible with popular bibliographical reference software such as EndNote, RefManager, ProCite and RefWorks.
OECD iLibrary also provides subscribers with **COUNTER3-compliant usage statistics.**

Three different reports are available, logging usage statistics for full-text downloads, meaning a user clicked on a PDF icon, a XLS icon, a WEB icon or a DATA icon. The reports will show monthly data for the selected calendar year. All relevant content titles are listed showing the actual usage with the totals in the first row.

Available in CSV format, the page display will allow a drop-down selection for the year and for the type of report. In coordination with COUNTER standards these reports are:

- **BR1** (Book Report 1 = Number of Successful Title Requests by Month and Title)
- **BR2** (Book Report 2 = Number of Successful Section Requests by Month and Title)
- **JR1** (Journal Report 1 = Number of Successful Full-Text Articles Requests by Month and Journal)

**MARC records** are available to all subscribers using MARC21 XML format according to U.S. Library of Congress specifications. Bibliographic details for books are available, covering monographs and serials. OECD iLibrary also provides records for all papers/journals and statistical content. MARC records are generated in English only, and describe the online version of a publication/serial, including other language versions.
OECD iLibrary contains many new features to make both librarians and their patrons’ lives simpler when searching and using OECD contents. New functions are under constant development. Amongst those already available or shortly to be released:

- Perpetual access to subscribed content
- Institution Branding Options
- Account Management Tools
- RSS feeds
- E-mail alerts
- Navigation help via hierarchical breadcrumb trails
- Option to email the page and to buy the book
- OpenURL-compliancy
- Support for Federated Searching Capabilities
- Reference Linking
